The Department of Construction Management, Faculty of Technology Management & Business School, Universiti Tun Hussein Onn Malaysia UTHM is proud to announce the successful re-accreditation of its Bachelor Degree of Technology Management (Construction) with Honours program by the Chartered Institute of Building (CIOB), UK — reaffirming its commitment to excellence in construction education and global professional standards. The CIOB accreditation panel conducted a comprehensive review of the program, evaluating curriculum content, teaching quality, industry engagement, and student outcomes. The panel commended the university for its emphasis on sustainability, digital construction technologies, and real-world project integration. “This re-accreditation is a testament to the hard work of our faculty members especially the Department of Construction Management, students, and industry partners,” said Assoc Prof Dr. Md Asrul Nasid Masrom, Dean of Faculty of Technology Management & Business. “It ensures our graduates continue to meet the highest international standards and are well-prepared for Chartered status and leadership roles in the construction industry.”

The CIOB panel highlighted several areas of excellence, including:

- Integration of Building Information Modelling (BIM) and project simulation tools
- Visible industry links and great internship opportunities
- Commitment and awareness of students and staff on CIOB UK matters and professional development

With this renewed accreditation, students enrolled in the program will continue to benefit from CIOB membership eligibility, access to global networks, and enhanced career prospects in both local and international markets. The university looks forward to deepening its collaboration with CIOB and further advancing construction education in the region.
